1913

~~nickel size~~  
~~holes~~

In answer to your further question about the contents of the leather holder for the eight ~~holes~~  
~~1913~~ ~~holes~~ in two rows of four each I can state the following:  
The five liberty head nickels were in the holder.  
The 1913 copper composition nickel Type II is still there and is Judd # 1790.  
The 1913 nickel pattern without the F (Judd 1789) was there but was sold in the  
1940s by B.G. Johnson for both of us.  
The 1913 Indian Head Type I regular issue was and is still in the holder.

This ought to clear up your questions.

Sincerely,

Eric P. Newman
